• API testing using the Rest Assured library and Postman.

•The main programming language is Java.

Working as a team and solving problems gives me happiness
Because of my previous duties in the education sector and administration, it has given me a lot of experience in dialogue with people.

It gives me pleasure to get results in a work that requires effort and to share them with others, to lead a team, and to do all the work in sync with the feeling of belonging in the work done.

When I encounter a problem, I would like to analyze the problem and solve it as soon as possible by sharing.
